1.EXECUTIVE SUMMARY

1.1 Project Overview

Project Name: CertsIN – Digital Certificate Portfolio Platform

Project Type: Full-Stack Web Application (Saas)

Business Problem:

Job seekers and professionals face significant challenges in sharing their professional certificates and credentials with recruiters and potential employers. Current methods involve:

- Sending multiple PDF attachments via email (unprofessional, cluttered)
-Uploading files to cloud storage and sharing multiple links
-Lack of professional, centralized presentation format
-Time-consuming process for both job seekers and recruiters
-Risk of files getting lost or misplaced in email threads

Proposed Solution:

CertsIN provides a LinkedIN-style professional platform where users can:

-Upload all their certificates to a single centralized location.

-Receive a unique, shareable link (CertsIN/username-####)

-Present certificates professionally with thumbnails and metadata.

-Enable recruiters to view and download certificates instantly

-Maintain a verified, professional digital credential portfolio

Expected Business Values:

-Time Savings: Reduce certificate sharing time from 5 minutes to 30 seconds (90% reduction)

-User Acquisition: Target 10,000+ professionals in first year

-Market Opportunity: $2B professional credential management marketing

-Competitive Advantage: First-to-market with recruiter-optimized certificate viewing

2.BUSINESS OBJECTIVES

2.1 Primary Objectives

Objectives	Description	Success Metric	Timeline
User Adoption	Acquire active users uploading certificates	5,000+ registered users	6 months
Platform Usage	Drive regular platform engagement	50+ daily certificate uploads	3 months
Recruiter Reach	Enable recruiters to view certificates	1,000+ profile views/day	6 months
User Satisfaction	Achieve high user satisfaction	NPS score > 50	6 months
Platform Reliability	Maintain high uptime	99.9% uptime	Ongoing

2.2 Secondary Objectives

-Build brand recognition in professional certification space

-Establish partnership with certification providers (AWS, Google, Microsoft)

-Create freemium revenue model with premium features

-Expand to enterprise B2B offerings (Company-wide credential management)

3. STAKEHOLDERS

3.1 Internal Stakeholders

Stakeholder	Role	Responsibilities	Interest Level
Product Owner	Vision & Strategy	Define product roadmap, prioritize features	High
Development Team	Implementation	Build and maintain platform	High
Business Analyst	Requirements	Document requirements, bridge business-tech	High
UI/UX Designer	User Experience	Design intuitive interfaces	Medium
QA Team	Quality Assurance	Test functionality and performance	Medium
DevOps Team	Infrastructure	Deploy and maintain cloud infrastructure	Medium

3.2 External Stakeholders

Stakeholders	**Description**	**Needs**	**Priority**
Job Seekers	Primary end users	Easy certificate upload and sharing	Critical
Recruiters	Certificate viewers	Quick, professional certificate viewing	Critical
HR Managers	Bulk Certificate verification	Efficient candidate credential review	High
Certification Bodies	AWS, Google, etc	Integration opportunities	Medium

Educational Institutions	Universities, Boot camps	Student portfolio platform	Low

4. BUSINESS REQUIREMENTS

4.1 High- Level Business Requirements

BR-001: User Registration & Authentication

Requirements: The system must allow professionals to create secure accounts and authenticate.

Business Justification: Secure user accounts are essential for data privacy and building user trust.

Priority: Critical

Category: Security & Access

BR-002: Certificate Upload & Storage

Requirement: Users musty be able to upload PDF certificates with optional metadata (title, issue, description).

Business Justification: Core functionality enabling users to build their certificate portfolio.

Priority: Critical

Category: Core Functionality

BR-003: Unique Shareable Link Generation

Requirements: Each user receives a unique, memorable link (CertsIn/username-####) to share with recruiters.

Business Justification: Provides professional, LinkedIn- style credential sharing experience.

Priority: Critical

Category: User Experience

BR-004: Certificate Preview & Thumbnail Display

Requirement: Certificates must display as visual thumbnails, not file names, for immediate recognition.

Business Justification: Visual presentation significantly improves recruiter experience and engagement

Priority: High-Level

Category: User Experience

BR-005: Public Certificate Viewing

Requirement: Recruiters must view certificates without authentication or registration barriers.

Business Justification: Reduce friction for recruiters, increasing platform adoption.

Priority: Critical

Category: Accessibility

BR-006: Certificate Download Capability

Requirement: Recruiters must be able to download original PDF certificates.

Business Justifications: Enablers recruiters to save certificates for candidate evaluation and records.

Priority: High

Category: Core Functionality

BR-007: Certificate Management

Requirement: Users must be able to edit metadata and delete certificates.

Business Justification: Gives users control over their portfolio presentation.

Priority: Medium

Category: User Control

BR-008: Mobile Responsiveness

Requirements: Platform must work seamlessly on mobile devices.

Business Justification: 60%+ of recruiters review candidates on a mobile device.

Priority: high

Category: Accessibility

BR-009: Fast performance

Requirement: pages must load in under 3 seconds; APR responses under 200 ms.

Business justification: speed directly impacts user satisfaction and recruiter engagement.

Priority: High

Category: performance.

BR-010 Professional Design

Requirement: Platform must present a clean corporate professional aesthetic.

Business Justification: Design quality reflects on user professionalism and platform credibility.

Priority Medium

Category: Branding

4.2 Business Rules

Rule ID	Business Rule	Rationale
BUR-001	Only PDF files are accepted for upload	Industry standard for certificates; ensures consistent viewing
BUR-002	Maximum file size:10mb per certificate	Balances quality with server storage costs
BUR-003	Username must be unique across platform	Prevents duplicate profile links
BUR-004	Display username format: username ####	Allows dame username with unique identifiers
BUR-005	Certificate metadata (title, issuer, description) is optional	Flexibility for quick upload vs detailed portfolios
BUR-006	Public profiles are accessible without authentication	Reduces recruiter friction,increase views
BUR-007	JWT token expire after 7 days	Balances security with user convenience
BUR-008	Users can have unlimited certificates	Initial growth strategy over monetization
BUR-009	Certificate deletion is permanent	Clear data management policy
BUR-010	Thumbnail generation is automatic	Ensures consistent user experience

5. SCOPE

5.1 In-Scope Features

Phase 1 (MVP – Completed)

-User registration with email/password

-User login with JWT authentication

-Certificate upload (PDF only)

-Automation thumbnail generation

-Dashboard for certificate management

-Public profile viewing

-Certificate CRUD operations (Create, Read, Update, Delete)

-Certificate download functionality

-Mobile-responsive design

-Preview image generation for full certificate viewing

5.2 Out-of-Scope Features

-Social authentication (Google, LinkedIn)

-Certificate expiration tracking

-Certification verification/validation with issuing bodies

-Certificate analytics (view counts, visitor tracking)

-Email notifications

-Certificate categorisation /folders

-Certificate sharing via social media

-Multi-language supported

-Certificate templates

-Bulk upload functionality

-API access for third party integration

-Premium subscription features

-Admin dashboard

-User profile customisation (themes, layouts)

Certificate watermarking

-QR code generation

-Resume integration

6. ASSUMPTIONS

6.1 Technical Assumptions

1. Users have stable internet connection for PDF uploads

2.Majority of certificates are single-page documents (95%+)

3.PDF files are valid and not corrupted

4.Users access platform via modern browsers (Chrome, Firefox, Safari, Edge)

5. MongoDB scaling will support projected user growth

6. Kubernetes infrastructure provides required reliability

7.PDF-to- image conversion completed within 2 seconds

8.Server storage scales with user growth

6.2 Business Assumptions

1. Job seekers actively seek digital certificate solutions

2. Recruiters prefer visual certificate browsing over file downloads

3. Users trust cloud based credential storage

4. Professional certification trend continues growing

5. Users are willing to share public profile links

6. Free tier sufficient for initial market penetration

7. Organic growth through word-of-mouth is achievable

8. LinkedIn-style profile format is universally understood

6.3 User Assumptions

1.Users can navigate web applications without extensive training

2.Users understand basic file upload operations

3. Users have access to digital certificates (PDF Format)

4 Users check email for registration verification

5. Recruiters have time to view certificate portfolios

7.CONSTRAINTS

7.1 Technical Constraints

Constraint	Description	Impact
File Format	PDF Only	Limits flexibility but ensures consistency
File Size	10MB max	May exclude high-resolutio scanned certificates
Browser Support	Modern browsers only	5% of older browser users excluded
Storage	Server-based (not CDN)	May impact global load times
Database	MongoDB	NoSQL limitations for complex queries

7.2 Business Constraints

Constraint	Description	Impact
Budget	Limited Marketing Budget	Growth relies on organic traffic
Timeline	3-month MVP deadline	Feature prioritisation required
Team Size	3-person development team	Limited parallel development
No Monetisation	Free tier in Phase 1	Revenue generation delayed

7.3 Legal/Compliance Constraints

Constraint	Description	Impact
Data Privacy	GDPR/CCPA compliance required	Additional development for data deletion
Terms Of Service	User agreement required	Legal review needed
Intellectual Property	Certificate ownership clarification	User must own/have rights to uploaded certificates
Liability	Platform not responsible for certificate authenticity	Clear disclaimer required

8. RISKS & MITIGATION

8.1 Risk Assessment

Risk ID	Risk Description	Probability	Impact	Mitigation Strategy
R-001	Low user adoption	Medium	High	Marketing campaign, user interviews, feature refinement
R-002	PDF processing failures	Low	Medium	Error handling, fallback to file icons user notifications
R-003	Server storage costs exceed budget	Medium	High	Storage optimization, compression, future premium tier
R-004	Security breach/data leak	Low	Critical	Security audits, penetration testing, encryption

R-005	Platform downtime	Low	High	Kubernetes HA setup, monitoring, incident response plan
R-006	Poor recruiter engagement	Medium	High	User research, UX testing, feature improvements
R-007	Fake certificate uploads	Medium	Medium	Disclaimer notices, Future verification features
R-008	Slow performance at scale	Low	High	Performance testing, optimisation, caching strategy

9. SUCCESS CRITERIA

9.1 Quantitative Metrics

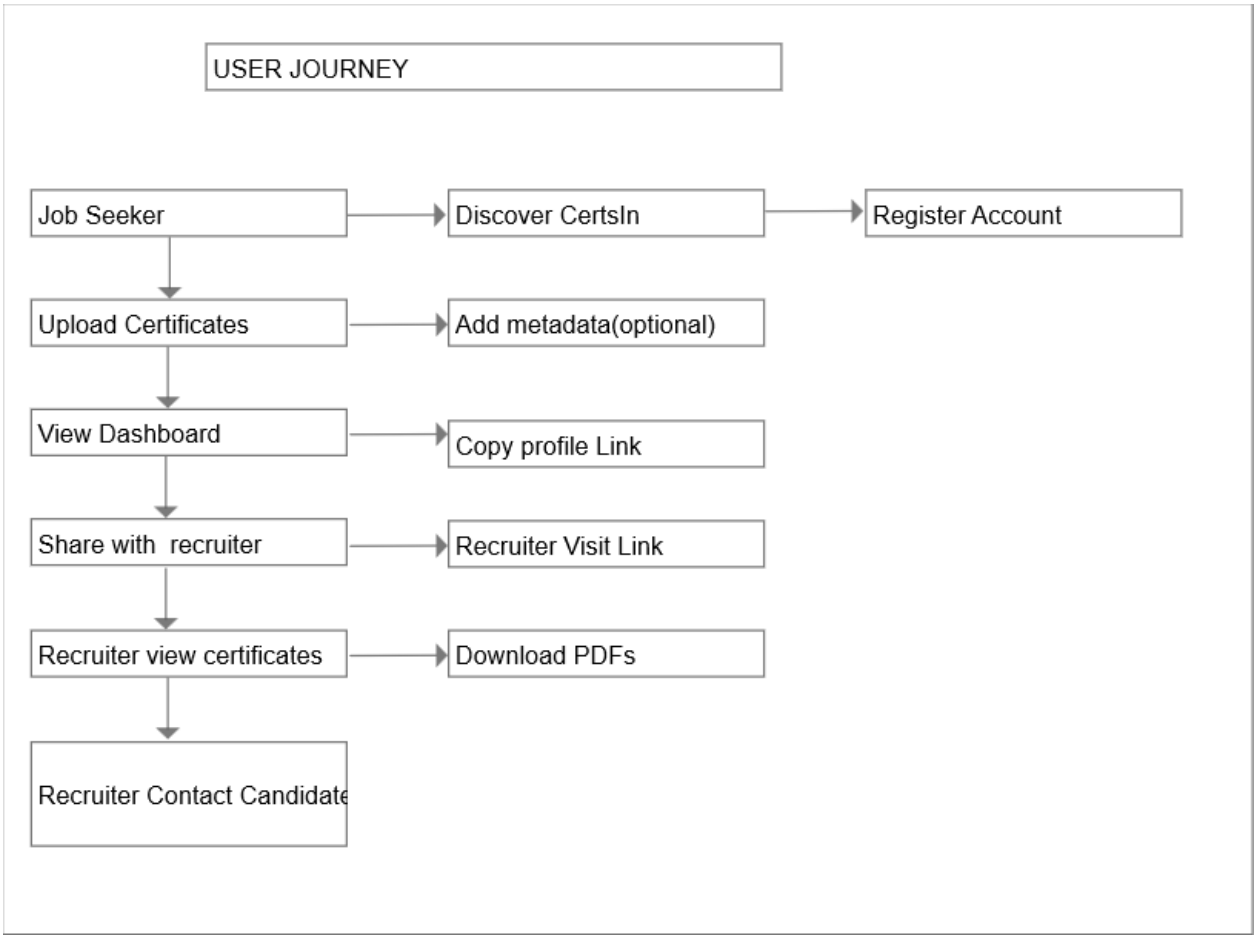
Metric	Target	Measurement method	Review Frequency
Registered Users	5,000+	Database count	Monthly
Daily Active Users	1,000+	Analytics tracking	Weekly
Certificate Uploads	50+ per day	Backend logs	Daily
Profile Views	1,000+ per day	Analytics	Weekly
Page load time	<3 seconds	Performance monitoring	Daily

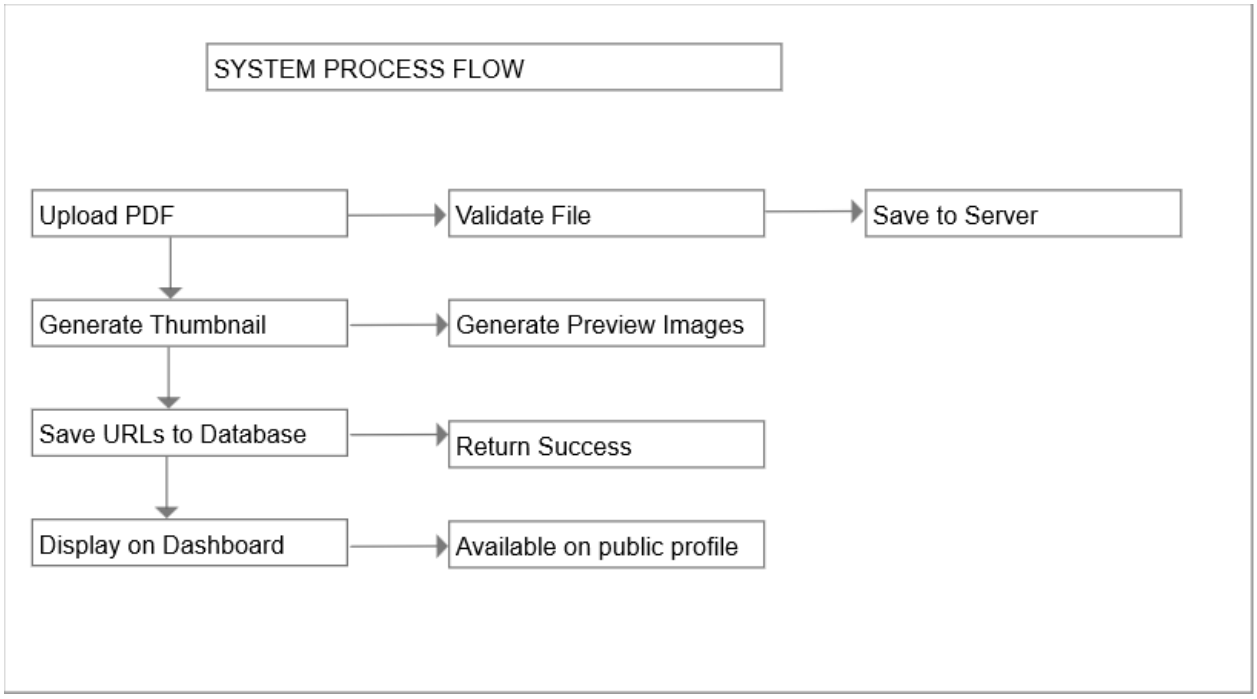
API Response Time	<200ms	Application logs	Real-time
System Uptime	99.9%	Monitoring Dashboard	Monthly

9.2 Qualitative Metrics

Metric	Target	Measurement Method
User Satisfaction	NPS > 50	User surveys
Ease of Use	4.5/5 rating	Post-upload surveys
Recruiter Feedback	Positive sentiment	Email feedback, reviews
Brand Perception	Professional keyword association	Social media monitoring
Feature Adoption	80%+ users add metadata	Usage analytics

10. HIGH-LEVEL PROCESS FLOW





11. PROJECT TIMELINE

11.1 Phase Breakdown

Phase	Duration	Key Deliverables	Status
Phase 1: Planning	2 weeks	BRD, FRD, Technical Design	Complete
Phase 2: Design	2 weeks	UI/UX mockups, Database schema	Complete
Phase 3: Development	8 weeks	Backend APIs, Frontend UI	Complete
Phase 4: Testing	2 weeks	QA testing, Bug fixes	Complete
Phase 5: Deployment	1 week	Production deployment, monitoring	Complete
Phase 6: Post-Launch	Ongoing	User feedback, iterations	In Progress

12. BUDGET ESTIMATE

12.1 Development Cost

Resource	Rate	Duration	Total
Business Analyst	$75/hr	160 hours	$12,000
Full-Stack Developer	$100/hr	320 hours	$32,000
UI/UX Designer	$80/hr	80 hours	$6,400
QA Engineer	$70/hr	80 hours	$5,600
DevOps Engineer	$90/hr	40 hours	$3,600
Project Manager	$85/hr	80 hours	$6,800
Total Development			$66,400
